Franziska is just over 15m although her registered size on the original tonnage certificate shows her as less.

This means in most marinas she would be accepted as a under 15m

However Almerimar marina measured her and found she was just over - about 70cm - and classed her as 18m.

Ask me about reducing her LOA

To follow is a very rough sketch of the dimensions.

She is currently insured till March 2025, third party, for £183.

We have enquired and the quote for full insurance with £50,000 cover is £590 a year

Velos. Detailing your every need.
